

Mentoring has been recognized as a powerful tool in career development of students of our college. Early career psychologists are advised to find mentors, either informally on their own, or to participate in formal mentoring programs. Regardless of how a mentor and mentee are matched, etiquette and ethics demand that the relationship be conducted in a professional manner with consideration and respect for both individuals. In Mentoring program the college administration identify several mentors in each department who can address a variety of career-related needs. The institution recognize and identify the need for mentoring, and then plan, develop, support, and promote a program that directly addresses needs of students.
