

4.2.1

Library is automated using Integrated Library Management System (ILMS)

College started Library automation in the year 2010 with Koha version 3.12.04.000 open source Integrated Library Management Software (ILMS) and current version 16.05.03.000 is in use. The functionality of Koha open source ILMS for all the housekeeping module has been customized by organizing many brainstorming interactive sessions with experts and Library Professional staff.

The Web OPAC facilitates searching of our college Library collections by providing location of a book in a particular library for accessing procured e-books from reputed publishers. The ILMS provides a distributed system of input for bibliographic details of the books, reference materials, Braille books, Audio CD collection etc. The software supports input OF bibliographical details of regional language collections by its original scripts.

User community can access the bibliographical data of library collections worldwide through WEBOPAC as it is hosted in cloud. Library catalogue included in copy cataloguing Z39.50 for its quality of cataloguing data.

Koha ILMS facilitates College user's community to access eresources by using User ID & password.

Got Best Koha Implementation Award in 2017 during 2nd National Koha Conclave.

Name of the ILMS software: Koha-open source integrated software Nature of automation (fully or partially): Fully Version: 16.05.

Colleges Utilizing the Library

Maharaja's College

UGL provide services to the students of
B.A,
B.Com, BBA, MA, M.Sc
Web link : <http://maharajas.uni-ysore.ac.in/>
